

ACUPUNCTURE FOR INFERTILITY - WILL IT WORK FOR YOU?

Acupuncture For Infertility - Will It Work For You?

Acupuncture for infertility promises a miraculous treatment even where modern scientific methods fail to work.

Being a Chinese remedy, acupuncture might conjure a feeling of dark rooms, hushed voices and incessant pains for pricking of needles, but it is not the case when you go to treat your infertility syndrome with acupuncture.

It, on the other hand, promises complete relaxation and an instant treatment for infertility.

Acupuncture is based on Chinese methods.

The Chinese people believed that to remain healthy, energy should flow in a balanced way throughout your body.

Whenever there is a blockage in the flow of that energy, inflammation will occur leading to severe pains and several types of diseases.

Since energy flows through the meridian points, so acupuncture inserts needles in different parts of the body to make energy flow smoothly.

Placing needles on certain points unblocks the energy points. This reduces the particular type of disease.

Which Acupuncture Treatment Will Suit You?

A close research on acupuncture and infertility shows that treatment depends from person to person.

However, you should visit your doctor, state your problem and know which acupuncture fertility treatment is right for you.

Suggest every detail of your physical condition to the doctor and then go for a particular acupuncture remedy.

Whether you are suffering from low sperm count, bad quality eggs, miscarriage problems, troubling ovulation or blocked Fallopian tubes, acupuncture has a remedy for all.

Acupuncture is best for those people who have already undergone various treatments without any effective results.

It is also appropriate for those who do not want to undergo any costly fertility treatments.

It is a safe, easy, reliable and painless method that provides fast relief from infertility.

Acupuncture for infertility includes pricking of needles in the earlobes, eyebrows, eyelids, ears and fingertips.

After the needles are pricked, the patient has to relax for 30 to 45 minutes.

Acupuncture is a complete treatment for infertility by just 3-4 regular sessions.

Other Chinese Herbal Treatments

Acupuncture for infertility can include auricular, electrified or manual treatments.

Electrified means using of electric needles to cure pains and obstacles.

Auricular treatment involving pricking of needles in the ears and earlobes is an alternative therapy for female infertility due to hormone disorders.

Another method used during acupuncture treatments for infertility includes usage of Chinese herbal medicines.

Hachimijiogan is a Chinese herb that subsequently reduces serum prolactin level and results in normal ovulatory cycle and pregnancy.

However, using rhubarb, endometriotic pill No 1 and Hochuekkito also reduces pelvic pain and intercourse pain, removes blood stasis, disintegrates mass and leads to purgation of serums.

Acupuncture works for infertility by increasing the production of endorphins or brain chemicals that help to reduce stress.

It also improves blood supply to the ovaries and the uterus.

This makes it easier for the uterus to nourish a foetus and reduce the risk of miscarriage effectively.

Atlanta acupuncture for infertility pregnancy suggests that the sessions stimulates the central nervous systems causing neurotransmitters and neurophormones to be released, thus reducing infertility effectively.

Why not give acupuncture a go to help
with your fertility?
