

STEP 1

For Steps 7 and 8 it's to your advantage to get those done as soon as you are possibly able to, but you're not under any pressure from us to meet any type of timeline requirements on them at all.

Please note there's a new file 'UPLOAD' section that's been added directly below. Please use this new feature for uploading ALL your files to be submitted as required.

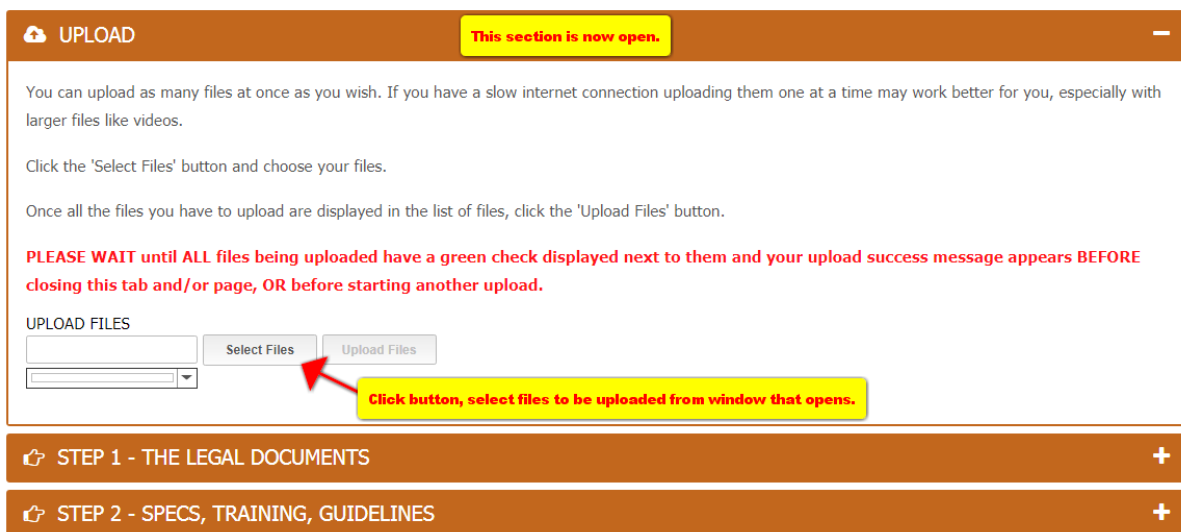

Notice... **UPLOAD** section here!

STEP 2

Please note there's a new file 'UPLOAD' section that's been added directly below. Please use this new feature for uploading ALL your files to be submitted as required.

This section is now open.

You can upload as many files at once as you wish. If you have a slow internet connection uploading them one at a time may work better for you, especially with larger files like videos.

Click the 'Select Files' button and choose your files.

Once all the files you have to upload are displayed in the list of files, click the 'Upload Files' button.

PLEASE WAIT until ALL files being uploaded have a green check displayed next to them and your upload success message appears **BEFORE** closing this tab and/or page, OR before starting another upload.
